SUSTAINABILITY

Solar powered. Water conscious. Environmentally focused. Sustainability is at the core of everything we do. It all starts at the top with our 400kW rooftop solar array — the largest of any distillery in the country — produces a yearly average of 472,000kWh of electricity. That's like adding 5,517 trees to our forests in terms of carbon sequestration.

Our first-of-its-kind water reclamation system recycles production water to use in future batches. We're working toward reclaiming 30% of all water in our whiskey production process. And it's not just about what goes into the bottle, how our barrels are made is important to us too. As a member of the White Oak Initiative, we're committed to the long-term sustainability of American white oaks and the forests they need to thrive.

We believe that you don't have to go far to get world-class ingredients. That's why we source our grains from a sixth-generation farmer just 50 miles from Tattersall Northeast. After we distill it, our spent grain goes to a local farm where it's used as cattle and bison feed. Locally sourced doesn't stop in the distillery: The trout is Wisconsin raised and smoked by Rushing Waters, and all of our cheese comes from Wisconsin too, including our curds from the Cheese Curd Capital in Elsworth, WI.

We also use organic apples from Minnesota, fruit from Wisconsin and Michigan, local honey and maple syrup, and even wild ingredients foraged by people on our team. Every spring, our head distiller Bentley Gilman forages spruce tips to make the very delicious spruce tip tonic — try the 22 & Spruce to taste for yourself.

Here, sustainability isn't a trend or a buzzword. It's a critical value that drives every decision we make and a process that we're constantly refining. We're here to make better drinks that make the planet better too. And we're just getting started.
